**AUSTRALIAN (AUD\$) RETAIL PRICE LIST** (Effective 1st Oct 2008)

	<b>Unit Quantity</b>	<b>Minimum Suggested Retail Price (inc. GST)</b>
<b>Nutrients</b>		
<b>GREENDREAM (ONE-part nutrient):</b> Liquid 'slurry' technology provides a better balance than the best 2 & 3-parts (see website data) :: Over 20% stronger than most 2-parts :: Fully soluble - no plumbing blockages :: Much less pH maintenance than most 2 & 3 parts :: Fast & simple dosing :: For hard or soft waters, in hydroponics (all substrates) or soil :: Available in Grow and Bloom	1L	\$19.50
	5L	\$55.00
	10L	\$95.00
<b>GREENDREAM (Two-part nutrient):</b> Same balance as GreenDream 1-part :: Undoubtedly the best performing, <i>most concentrated</i> and <i>stable</i> 2-part (over 10% stronger than most 2-parts) :: Fully soluble - no plumbing blockages :: Much less pH maintenance than most 2 & 3 parts :: For hard or soft waters, in hydroponics (all substrates) or soil :: Available in Grow and Bloom **1L part 'A' and 'B' are packaged in separate cartons; 5L carton contain both part 'A' and 'B'; 20L are packaged in plastic drums	1L	\$27.50
	5L	\$84.00
	20L	\$275
<b>DUTCHTREAT (Hard water ONE-part nutrient):</b> Specific for hard and salty waters :: All nutrients in ONE bottle for easy/foolproof dosing :: Nutrient strength rivals the best 2-parts :: Much less pH maintenance than most 2 & 3 parts :: For hydroponics (all substrates) or soil :: Available in Grow and Bloom	1L	\$17.00
	5L	\$50.00
	20L	\$145.00
<b>Additives</b>		
<b>PYTHOFF 10g/L:</b> Hydroponic nutrient conditioner :: Maximizes effective working life of water and nutrient :: Non systemic and safe to use from seed through to harvest :: Compatible with all systems and substrates :: Very economical (1-2ml/10L)	500ml	\$23.00
	1L	\$40.00
	5L	\$155.00
<b>PYTHOFF 25g/L:</b> Commercial grower formulation	20L	\$225.00
<b>PYTHOFF TEST KIT:</b> Helps optimise Pythoff dose :: ~150 tests	5gm	\$15.00
<b>SILIKAMAJIC (26% Potassium Silicate):</b> Increases plant strength, health & weight :: Increased tolerance to wilting :: SilikaMajic is very concentrated (0.2ml/L) :: The silica is in the "available" form - some silica products contain zero available silica :: Indefinite shelf-life - silica supplements are generally very unstable	250ml	\$30.00
	1L	\$85.00
	5L	\$260.00
	20L	\$750.00
<b>GROSTORM:</b> 100% organic based additive :: The full suite of organics needed from seed to harvest :: Contains a chelating agent to promote root uptake :: Promotes plant vitality, yield, quality and increased resistance to environmental stress :: Highly stable and super concentrated (0.5-1ml/L) :: Vented cap prevents bottle from collapsing or exploding	500ml	\$30.00
	1L	\$50.00
	5L	\$210.00
	20L	\$620
<b>BUDSTORM:</b> Essential flowering compounds for promoting large floral blooms of optimum size and quality :: Causes minimal pH increase - unlike other flowering additives :: Very concentrated (0.5-1.0ml/L) :: 13% P2O5   11% K2O	1L	\$25.00
	5L	\$90.00
	20L	\$275.00

<b>Cuttings &amp; Seedlings</b>		
<b>TWINTech STARTER:</b> Essential day 1 treatment for preparing stem cuttings prior to planting :: Liquid formula	60ml	\$10.50
	250ml	\$30.00
<b>TWINTech FERTILIZER:</b> Significantly improves the growth and survival rate of cuttings and seedlings :: Used with 'TwinTech Plus' this provides complete nutrition, root stimulation and conditioning of the nutrient :: A rich formulation of essential nutrients including the spectrum of inorganics :: Buffers root-zone / medium pH below 6.5 :: Use at 5ml/L	500ml	\$25.00
	1L	\$45.00
	5L	\$175.00
<b>TWINTech PLUS:</b> Significantly improves the growth and survival rate of cuttings and seedlings :: Used with 'TwinTech Fertilizer' this provides complete nutrition, root stimulation and conditioning of the nutrient :: Use at 5ml/L	500ml	\$30.00
	1L	\$55.00
	5L	\$210.00
<b>pH Control</b>		
<b>pH TEST KIT:</b> ~800 tests per bottle (1 drop per test) :: Measures pH 4.0 through to 8.0 :: Waterproof color chart on side of bottle :: Near unbreakable test vial :: Detailed instructions on pH control	30ml	\$12.00
<b>pH UP:</b> Non-dangerous good :: Super concentrated (600g/L potassium carbonate) <b>pH DOWN:</b> Super concentrated (800g/L phosphoric acid) :: Child resistant capping	250ml	\$8.00
	1L	\$20.00
	5L	\$80.00
	20L	\$275.00
<b>Electrode Maintenance</b>		
<b>ELECTRODE CLEANER:</b> For pH & conductivity meter electrodes :: Removes both inorganic <u>and</u> organic contamination :: Minimizes the need for re-calibration and helps maximize electrode life-span	250ml	\$9.00
	1L	\$22.00
<b>pH ELECTRODE STORAGE:</b> Dry storage is the most common cause of pH meter failure :: Helps maintain electrode accuracy, response time and eliminates reading 'drift' :: <u>Note</u> , pH buffers 7.0 or 4.0 and distilled water are not suitable for storing pH electrodes as they can upset electrode calibration	250ml	\$8.00
	1L	\$18.00
<b>Electrode Calibration</b>		
<b>pH BUFFER 4 &amp; 7 :</b> Made by chemists :: Stabilised to resist algae or growth formation :: Extensive instructions on label	250ml	\$7.00
	1L	\$15.00
<b>CONDUCTIVITY STANDARD (2.76mS/cm):</b> Made by chemists :: Stabilised to resist algae or growth formation :: Extensive instructions on label	250ml	\$7.00
	1L	\$15.00
